Photographs of 'Architecture of Commons' by Ms. Smruti Johari

Builder-Architect:
Their primary need is to understand **"How could it be built?"**

the architect who wants to build the projects with his hands, who wants to understand how it goes together. They find the true value in the act of building, whether directly or via proxy of documentation.

Artist-Architect:
Their major question for is **"What should be built?"**

the architect who love designing through the trade—whether pencil or models, or digitally.

Philosopher-Architect:
Their overriding quest is to understand **"Why will it be built?"**

the architect who cares more about the concepts and ideas than the execution via artistry or built form. We all have our personal favorite (or hated) theorists who clearly fall into this category.
