### Cover note :

Several topics are identified to add value to the existing course curriculum under different domains. Experts are invited from various fields to conduct the courses that include hands on workshop activities. The course syllabus is designed to incorporate analytical studies, field visits, documentation, surveys etc. desired by the architecture curriculum and the intended outcomes are achieved in the stipulated time.

On successful completion of the courses certificates are awarded to the students.

During the pandemic as hands on courses were not possible, the students enrolled and completed courses like Coursera, edX which are Online Platforms that offer value added courses by leading International Universities

Pillai HOC College is associated with ISRO (Indian Space Research Organization). The Pillai's ISRO Outreach network Institute allows our students to access the vast expertise of ISRO in areas of Remote sensing, GIS technology through a large number of free courses.

### Criteria 1 – Curricular Aspects

#### 1.2 Academic Flexibility

**1.2.1 Number of Add on /Certificate/Value added programs offered and online MOOC programs like SWAYAM, NPTEL etc. where the students of the institution have benefitted during the last five years)**

In response to the DVV clarification, we would like to justify the claim on grounds of differing nomenclature used by various disciplines to title their courses.

We could best explain the clarifications raised in DVV through the following explanation:

#### **Value added certificate courses – Workshops:**

- The Bachelor of Architecture course places great emphasis on practical and experience based learning. Wherever the value addition courses are on the basis of hands on work and direct participation, they are often referred to as “Workshops”
- These **value added courses** satisfy the requirement of imparting employability skills and also address lacunae in our syllabus.
- They also satisfy the requirements of course duration as stipulated for value addition courses.
- **Certificates** are issued on successful completion of the course to all participants.
- These courses play an important part in filling the gap between industry and academics.

#### **Value added certificate courses - Online courses:**

- Coursera, edX – These are Online Platforms which offer value added courses. Our students availed of these courses during the pandemic as hands on courses during that time period were not possible.
- These courses also satisfy the requirement of course duration as stipulated for value addition courses.
- Certificates are issued on successful completion of the course to all participants.

### Value added certificate courses – Collaborative studios

- These are mentored courses attended by our students for specific project based inputs from master mentors specialized in specific fields.  
For e.g. Housing, Health care, Educational Institutions etc.
- These courses also satisfy the requirement of course duration as stipulated for value addition courses.
- Certificates are issued on successful completion of the course to all participants.

On the basis of the above points, our inputs that are termed as workshops, online courses and other skill up gradation courses may be considered to be valid.

### Cover note :

Several topics are identified to add value to the existing course curriculum under different domains. Experts are invited from various fields to conduct the courses that include hands on workshop activities. The course syllabus is designed to incorporate analytical studies, field visits, documentation, surveys etc. desired by the architecture curriculum and the intended outcomes are achieved in the stipulated time.

On successful completion of the courses certificates are awarded to the students.

During the pandemic as hands on courses were not possible, the students enrolled and completed courses like Coursera, edX which are Online Platforms that offer value added courses by leading International Universities

Pillai HOC College is associated with ISRO (Indian Space Research Organization). The Pillai's ISRO Outreach network Institute allows our students to access the vast expertise of ISRO in areas of Remote sensing, GIS technology through a large number of free courses.

### Criteria 1 – Curricular Aspects

#### 1.2 Academic Flexibility

**1.2.1 Number of Add on /Certificate/Value added programs offered and online MOOC programs like SWAYAM, NPTEL etc. where the students of the institution have benefitted during the last five years)**

In response to the DVV clarification, we would like to justify the claim on grounds of differing nomenclature used by various disciplines to title their courses.

We could best explain the clarifications raised in DVV through the following explanation:

#### Value added certificate courses – Workshops:

- The Bachelor of Architecture course places great emphasis on practical and experience based learning. Wherever the value addition courses are on the basis of hands on work and direct participation, they are often referred to as "Workshops"
- These **value added courses** satisfy the requirement of imparting employability skills and also address lacunae in our syllabus.
- They also satisfy the requirements of course duration as stipulated for value addition courses.
- **Certificates** are issued on successful completion of the course to all participants.
- These courses play an important part in filling the gap between industry and academics.

#### Value added certificate courses - Online courses:

- Coursera, edX – These are Online Platforms which offer value added courses. Our students availed of these courses during the pandemic as hands on courses during that time period were not possible.
- These courses also satisfy the requirement of course duration as stipulated for value addition courses.
- Certificates are issued on successful completion of the course to all participants.

### Value added certificate courses – Collaborative studios

- These are mentored courses attended by our students for specific project based inputs from master mentors specialized in specific fields.  
For e.g. Housing, Health care, Educational Institutions etc.
- These courses also satisfy the requirement of course duration as stipulated for value addition courses.
- Certificates are issued on successful completion of the course to all participants.

On the basis of the above points, our inputs that are termed as workshops, online courses and other skill up gradation courses may be considered to be valid.

<b>Program approved by</b>	Suchita Sayaji, Principal, PHCOA
<b>Brief about the activity/event</b>	The Value Added course was planned to make students aware about the unique urbanity of textile mills of Mumbai. The historic textile mills of Mumbai were powerful entities in helping the city to grow by leaps and bounds. These mills created a unique social and economic culture in the city. The students first briefly studied the development of textile mills in Mumbai mid-nineteenth century onwards. They then chose a few case-studies from the timeline, based on factors like availability of data, status of dilapidation/ conservation,

Brief about the activity/event	India is one of the ancient civilizations of the world with its history going back as far as the Indus Valley civilization. House and family have always been an important part of Indian life, culture, and history. House has always been considered as a living being and has been designed as the adobe of Gods. Vaastu Shastra principles which have been developed over the ages were the guiding principles for the construction of houses, town planning, temple architecture, and sculpturing in India for centuries. Vaastu in the context of Vaastu Shastra means a place where immortals and mortals dwell. It, therefore, the Value Added course focus on making students understand and learn principles of Vatu shastra, its implementation in architectural planning and were awarded a certificate for successfully incorporating the principles in their design.
Remarks	The students understood the principles and science revolving around the Vastu Shastra.

### A Report on Value Added Course- Rhino Architecture: Introduction to Parametric Modelling

Academic year: 2022-23

<b>Organised by</b>	Pillai HOC College of Architecture, Rasayani
<b>Objectives</b>	Following are the outcomes of the SDP <ol style="list-style-type: none"><li>1. Participants will be able to <b>compare</b> static design (2D and 3D) with parametric design using visual programming.</li><li>2. Participants will be able to <b>implement</b> visual programming through Grasshopper in Rhino for parametric design.</li><li>3. Participants will be able to <b>recommend</b> Grasshopper components to create parametric designs.</li><li>4. Participants will be able to <b>generate</b> algorithms using Grasshopper for parametric designs.</li></ol>

<b>Brief about the activity/event</b>	The construction industry has grown at a very rapid pace and the designs are becoming complex. Challenging geometrical shapes are being routinely proposed in the field of architecture. These challenging forms are a blend of generative design through complex mathematical calculations. With the advent of visual programming tools such as Grasshopper, designers are relieved from the hard work of learning the syntax of programming and focus on the design. The skill of visual programming to create a parametric design can efficiently produce more than one design alternatives within fraction of second. The visual programming skill is one of the most in demand skill in the industry. Moreover, thinking, sketching and formalizing an algorithm for a parametric design leads to crystal clear understanding of proposed structure along with its phases of

Title of the course	:	Revit Architecture (Detailing of Steel Structures: A BIM Approach using Revit)
Course Duration (Hours)	:	30
Course Aim	:	Improve visualisation and detailing of steel structures.
Course Outcomes	1	Participants will be able to <b>differentiate</b> between structural steel connections. (L4)
	2	Participants will be able to <b>plan</b> building services as per the detailing requirement of proposed steel connections. (L6)
	3	Participants will be able to <b>construct</b> long span steel structures by providing detailed drawings to the fabricator. (L6)
	4	Participants will be able to <b>create</b> a BIM model for informed decision making and effective monitoring of the steel structure project. (L6)
Mode of Delivery	:	Offline / Online
Course Coordinator	:	Prof. Shivaji M. Sarvade
Course Instructor	:	Prof. Shivaji M. Sarvade

**Detailed Course Content**

Day 1		
Lecture No.	Time	Content
1	10.00 am-11.00 am	Introduction to steel structure and importance of connections in steel structures.
2	11.00 am-12.00 Noon	Types of members and classification of connections
3	12.00 Noon -1.00 pm	Types of bolted connections
4	1.30 pm-2.30 pm	Types of welded connections.
5	2.30 pm-3.30 pm	Introduction to Shear Connections
6	3.30 pm-4.30 pm	Introduction to Moment Connections

<b>Brief about the activity/event</b>	The heart of any steel structure is their connections. It is difficult for the student to visualize the connections as most of the steel structures are covered. Even the students find it difficult to understand if they just draw a two-dimensional drawing of various connections. Steel Structures are more challenging to construct as the fabrication needs to be precise and many parts prepared in the workshop are to be assembled together to create a structure. This is precisely why in the professional practice, the BIM tools such as Revit, TEKLA etc. are used for better coordination among all the stakeholders of a steel structure project. With this in mind, the workshop is designed so that participants become

Participants will be able to model, visualize, analyze and select appropriate connections, for efficient space planning and avoid clashes which might arise if the 3-dimensional modelling is not carried out. The SDP will start with creation of grids and levels and advance step by step to a finished steel warehouse model.

## ACEDGE Collaborative studio

### Acedge- An Ethos of Learning

ACEDGE is an e-learning offering from Ethos for learners in the field of Architecture, Construction, Engineering and Design.

ACEDGE is an offering from Ethos towards ensuring that architects and designers of this country's destiny are better-equipped to face the challenges of an ever-changing ACED industry. Manifesting as an online education platform for learners in the field of architecture, design and construction, ACEDGE seeks to bring to the fore, the basic human values that are needed to be a full-fledged human being; a decent, productive citizen of this country; a responsible and creative professional contributing positively to society.

Subject: Coursera for Campus Response Program Launch - 04/16/2020

To: <[ppillai@mes.ac.in](mailto:ppillai@mes.ac.in)>

**coursera** for Campus

Hi Priam Pillai,

Thank you again for expressing interest in Coursera!

Our mission is to transform lives through learning, and we want to help your students by offering courses online to minimize the impact of the coronavirus on their education. We are glad to be able to support your community with this response initiative. We're excited to let you know that your Coursera for Campus program is ready and you can access your new program(s) [here](#).

The following individual has been provided organization administrator access. They can add additional administrators on your Coursera portal. Shortly, you will receive a separate email inviting you to take a short course on our platform that provides you an overview of all the features of your Coursera for Campus portal. You can review the program, dashboard settings and start adding learners from your campus by inviting your learners from the [invitation tab](#) within your program.

Please find attached the following:

- **Admin Walkthrough:** A deck and [recorded training](#) which explains all the Admin features of the platform. Also, please refer to our [Administrator Help Center](#) which is a great resource as well.
- **Learner Experience:** A deck which explains the learner features. Also, please refer to our [Learner Help Center](#) and please do direct the learners to it as well.
- **Student Awareness Kit:** A tool kit of materials that you can use to engage your learners to start learning on Coursera.
- Both the Admins and Learners have 24x7 chat support from our support staff available on the respective help center.
- Admins can also reach out to us by emailing [clientsupport@coursera.org](mailto:clientsupport@coursera.org). We have a tiered support structure in place where issues/queries can be escalated as needed.
- **Qwiklabs FAQ** for any learner questions around accessing labs via GCP Coursera courses.

Thank you,

Coursera for Campus Team

### About IIRS

Indian Institute of Remote Sensing (IIRS), a unit under Indian Space Research Organization (ISRO), Department of Space, Government of India is a premier Training and Educational Institute set-up for developing trained professionals in the field of Remote Sensing, Geoinformatics and GNSS Technology for Natural Resources, Environmental and Disaster Management. Formerly known as Indian Photo-interpretation Institute (IPI), founded in 1966, the Institute boasts to be the first of its kind in entire South-East Asia. While nurturing its primary endeavor to build capacity among the user community by training mid-career professionals, the Institute has enhanced its capability and evolved many training and education programmes that are tuned to meet the requirements of various target user groups in the society, ranging from fresh graduates to policy makers including academia.

The training and education programmes at IIRS includes the short duration customized courses, PG Diploma, Master's Degree (M.Tech and M.Sc.) in various disciplines. IIRS also conducts distance learning programmes under IIRS Outreach Activity.

### IIRS Outreach Programme

IIRS Outreach Programme focusses on strengthening the Academia and User Segments in Space Technology & Its Applications using Online Learning Platforms. IIRS distance learning program was initiated in 2007 with the participation of twelve universities in India. Till date, IIRS has successfully conducted 45<sup>th</sup> programs through live and interactive classrooms (also known as EDUSAT programme) and also launched five online courses under e-learning programme. Currently IIRS distance learning programme is being conducted through following modes:

1. Live and Interactive classroom sessions (<https://dlp.iirs.gov.in>)
2. E-learning based online courses (<https://elearning.iirs.gov.in>)

### Live and Interactive classroom

The use of Remote Sensing, Geographical Information System, Global Navigation Satellite System and associated geospatial technologies is increasing rapidly, creating an urgent demand for trained manpower. The live and interactive mode of distance learning is enabled through Internet and A-view software platform developed by Amrita e-learning Lab in collaboration with Ministry of Human Resource Development (MHRD) Government of India. The programs are available through Internet without any cost to the user. The live and interactive sessions will be conducted by experts from ISR-ISRO and other knowledge Institutions. IIRS has successfully conducted 45 such courses so far with participation of over 96000+ participants from 920+ academic institutions, government departments and industry. The beneficiaries of the programme may include:

- ❖ Central/State/Private Universities & Academic Institutions;
- ❖ Central & State Government Organizations/Departments;
- ❖ Research Institutes;
- ❖ Geospatial Industry;
- ❖ NGOs.

IIRS also conducts various theme oriented online courses and monthly webinars on recent topics on geospatial technologies and its applications. Users are encouraged to actively participate on these programs. For more detail please visit IIRS official website- [www.iirs.gov.in](http://www.iirs.gov.in)

### Course Announcement

IIRS announces four courses commencing from August 19<sup>th</sup>, 2019

- ❖ **Remote Sensing and Digital Image Analysis (19/08/2019 to 13/09/2019):** Basic Principles of Remote Sensing, Earth Observation Sensors and Platforms, Spectral Signature of different land cover features, Image interpretation, Thermal & Microwave Remote Sensing, Digital Image Processing: Basic Concepts of Rectification and Registration, Enhancement, Classification and accuracy assessment techniques.
- ❖ **Global Navigation Satellite System (16/09/2019 to 27/09/2019):** Introduction to GPS and GNSS, receivers, processing methods, errors and accuracy.
- ❖ **Geographical Information System (30/09/2019 to 25/10/2019):** GIS, databases, topology, spatial analysis and open source software.
- ❖ **RS and GIS Applications (29/10/2019 to 24/11/2019):** Agriculture and Soil, Forestry and Ecology, Geoscience and Geo-hazards, Marine and Atmospheric Sciences, Urban and Regional Studies and Water Resources.
- ❖ **Basics of Remote Sensing, GIS and GNSS (19/08/2019 to 24/11/2019):** Comprehensive course consisting of above four courses.

The participants can register for individual course of their choice or the entire Programme.

### Target Participants

- ❖ Student of Undergraduate and Postgraduate courses (any year);
- ❖ Technical/ Scientific Staff of Central/ State Government Ministries/ Departments;
- ❖ Faculty / Researchers at university / Institutions.

### Course Study Material

Course study materials such as lecture slides, video recorded lectures, open source software, data & handouts of demonstrations, etc., will be made available through IIRS ftp link (<ftp://ftp.iirs.gov.in>) Video lectures will also be uploaded on YouTube Channel (<http://www.youtube.com/user/edusat2004>).

### Course Fee

There is no course fee.

### Course Registration

Course updates and other details will be available on URL- <https://elearning.iirs.gov.in/>

- ❖ To participate in the program, organizations/universities/departments/ institutes have to identify a Coordinator at their end. The coordinator is required to register his/her institute as nodal centre at: (<https://elearning.iirs.gov.in/edusatregistration/coordinator>).
- ❖ All the participants have to register online through registration page (<https://elearning.iirs.gov.in/edusatregistration/student>) by selecting his/her organization as nodal centre.
- ❖ The Coordinator is required to approve the participants from his/her institute for each course.

### Course Funding & Technical Support

The programme is sponsored by Indian Space Research Organization, Department of Space, Government of India.

Programme can be received through Internet connectivity of 2Mbps or better. Following hardware and software set-up is required at user end:

#### Hardware Requirements:

- ❖ High-end Computer/Laptop (Windows OS);
- ❖ Good quality web camera (optional);
- ❖ Headphone with Microphone (optional) and Speakers;
- ❖ Large Display Screen (Projector or TV).

#### Software and Internet Requirements:

- ❖ Programme can be receive live through internet using freely available software from IIRS

#### Connectivity & Other configurations:

- ❖ NKN or any other high speed internet facility (preferably without firewall, with minimum of 2 Mbps bandwidth)
- ❖ Network requirements: Port 80 and RTMP (port 1935) protocol should be unblocked from user's computer and Firewall.

Note: Participating Institutions have to bear total expenses for establishment of the classroom facility.

### Award of Certificate

Working Professionals/Students: Below Guidelines will be followed to award the certificate.

- 1- Based on 70% attendance and minimum 40% passing marks in online examination.
- 2- 20% weightage will be given for classroom activity (mandatory)

3- Grading system will be followed

A+	90-100
A	80-90
B+	60- 80
B	40- 60

### Feedback Mechanism

The participants and participating organizations are invited to attend annual IIRS User Interactive Meet (IUIM) at IIRS Dehradun. The participants can submit their feedback online through IIRS e-Learning portal. Feedbacks are critically analyzed and implemented in next courses.

Outreach Programme Feedback Session during  
IIRS Academia Meet (IUIM)-2019

IIRS received two national awards for excellence in training for outreach and e-learning programme by Department of Personnel & Training (DoPT), Govt. of India in collaboration with United Nations Development Programme (UNDP).
