Brief about the activity/event	<p>A college student recently completed a wall painting project for a primary school as part of their N.S.S. The project aimed to brighten the school environment and provide the children with a more visually appealing space to learn and play. The design of the wall painting was carefully planned and executed by the college student. The design included bright colours, fun shapes, and educational elements such as letters, numbers, and animals.</p> <p>The college student spent two days working on the wall painting project. They sketched out the design on the wall using chalk before starting to paint. The painting used acrylic paint, which is durable and easy to work with. The college students and villagers worked carefully to ensure the painting was neat and precise.</p> <p>The wall painting project had a significant impact on the primary school. The children were delighted with the new look of their school, and the bright colours and fun designs helped to create a more positive and engaging learning environment. The school teachers and Grampanchayat members also appreciated the effort the college students and villagers put in, and the project helped foster a sense of community and collaboration between the college and Grampanchayat members.</p>
